# ARCHITECTS OF SOUND

## CONCEPT

Uandksound has a strong sense of commitment with its acoustic and visual esthetics design. Naturally, their technical reliability and value are beyond our motto. Even the most innovative design is constantly improving so that Uandksound builds progress into every product investing the effort to satisfy even the most discerning customer. That being so, we only offer the latest in audio technology for long term enjoyment.

We do not produce cheap loudspeakers and certainly we do not offer a poor sound. Fortunately, many thousands of audiophiles worldwide agree with our philosophy.

Uandksound designs are easily integrated into your living room. Their full enjoyment should not require a complex installation. Either to watch a movie or listening to your favorite singer, Uandksound brings to you an extensive catalog where young or elderly audio enthusiast can find the most suitable solution according to their preferences and possibilities without issue or compromise.

## WHAT MAKES US DIFFERENT

There are many companies manufacturing great loudspeakers, but Uandksound is the sole company designing and manufacturing an innovative line of high-end cinema and custom loudspeakers among others. We don't design our products as others, Uandksound offers individual unique solutions to the problem of seamlessly integrating high-quality sound into the living environment. Uandksound products are virtually perfect for any application so that you should not complicate your mind to settle for another loudspeakers, that's one reason for choosing Uandksound, the best reference loudspeakers on the market will not make you happy unless the system is properly conceived, designed, installed, and explained. This is why Uandksound works with the best worldwide distributors, some of them CEDIA members, offering exemplary factory support. You can be completely sure that the best experience will be grant for a long time after the sale.

Only settle for the best! Uandksound is by far the best option to enjoy the most impressive sound for years without having to think about anything else to enjoy.

## DESIGN

"Loudspeaker as an integral part of the environment"

A loudspeaker carries out the dual function of musical source and item of furniture in your home environment. Uandksound design complies with conceptual style. It is the result of a continued integration between acoustic design and visual harmony. Just where the style and design imposed also define acoustic identity, or like a design element whose aesthetic value is judged by its coherence with its function.

The loudspeaker cabinet is of such fundamental importance that we drew inspiration from the construction concepts of some well known stringed instruments. This is how Uandksound loudspeakers achieve their pure, natural and definitive acoustic timbre.

## TECHNOLOGY

Investment in cutting-edge technology is our way to succeed. Before assembling the components are carefully selected and only those conforming to tightly defined tolerances are ultimately processed. The same care and attention is dedicated to the production of the crossover network, which along with the loudspeakers, is of fundamental importance to the quality of the diffusers.

Our extensive listening tests are a crucial part of the manufacturing process before each speaker and electronic are burned-in and thoroughly measured for several days. Uandksound products advance to the final manufacturing step only if the measurements show no deviation. At the end, skilled, well trained ears test every component to ensure that everything is up to Uandksound standards.

### STYRENE RUBBER BOUNDARY

By using the latest styrene-butadiene rubber (SBR) process to give you the best in reflex presentation and balance in all measurement without overload or malfunction. The width of the rubber edge is carefully designed to give flexible dimension. It would not pull the drive in rapid motion not under load in slower motion. This will also avoid transmitting the reversed phase of sound waves thus generating any acoustic wave interference. By using the double R analysis double ring, this will achieve it's functionality without compromise.

### CONE

The traditional low cone used today had already given a good sound quality, yet Uandksound had designed methods and materials to give you even greater sound effect. We use significant materials to design the cone, thus achieving the best steel effect to produce greater efficiency. Uandksound's middle unit took full advantage of welding the shell section to give you a greater penetrating and delicate sound.

### COIL TUBE

The three usual materials used, KSV, TIL and ASV, produce different sound effect, yet they all act to assist the control and balance of the speaker. Because Uandksound wanted a unique sound quality, we adapt the combination of the coil tube and cone to give you the best possible design in demand.

## WAVELENGTH

Uandksound uses the best elasticated conex to form the master wavelength by combining the high heat formula process. This would give you the elasticity require, and by using the R and triangular designs in support, the movement of the speaker is not compromised.

### SPEAKER SHELL

- We use ladder effect design for all our speakers, thus wide at the front and narrow at rear. This design will reduce sonic repercussion and diffraction. This will give the speaker more clearer and detailed sound.
- Thinner wall layer not just give the speaker greater atmospheric compression, but also more dynamic driving force, and to give the speaker more transient effect at the same time.

### CROSSOVER

- Using 12dB in design as well as implementing middle and high frequency impedance compensation process to balance the sound effect.
- To give an accurate spread of all different areas in the speaker, and using the best quality component in tune to produce the best sound field.

## CINEMA SERIES

# Reference Speakers

### Designed for success

The culmination of the most innovative design is presented with Reference Series; the result of a long technical research project in collaboration with expert sound engineers from the film industry. Only they really know how the sound is in a movie, now our challenge is to transport the original sound to your home in the most perfect way thanks to the wisdom of our engineers and technical components of the highest quality.

We could start by referring to the high-density loudspeakers enclosure thanks to which we have obtained an improved dynamic performance that translates us into an extended frequency response to meet THX standards. The powerful woofer equipped with an oversized magnet is the key element of the bass unit to bring exceptional impact to the most demanding recordings.

On the other hand, the horn tweeter configuration in the same plane presents a more precise sound directionality to locate the sound scene in greater detail, either in the main channels as well as in the effects channels. The Reference Series modular configuration has been developed to allow easy placement behind large projection screens. In this way, greater integration with all the room environments is very valuable for the most advanced audiovisual engineers.

I've tried many high-end speakers over the years, they all sounded really good, but Uandksound Reference Series are different from the rest because only allows us to focus on what really matters, the sound.

### Sound architects

It is not easy to find a design that identifies us, but we do not like to be the same as the competition. All our loudspeakers have been created to be an integral part of the home decoration and it is so when Uandksound was born with the aim of reliving the experience of feeling like one more protagonist of the seventh art hand in hand with the best sound experience. Commercial movie theaters have undergone continuous technical improvement in recent years besides recordings media. However, there is no doubt that everything can be improved and that is where Uandksound is positioned.

The last six years we have designed high-performance loudspeakers easily integrated with all kinds of environments and decoration projects such as the successful M6 Series, but in our quest to seek perfection and integrate the best technology, design and quality, we have advanced one step further in perfection.

For us, perfection can only be defined in one way, reference, understood as the example to be followed by others to be the best. Having our own identity is achieved through the most

advanced designs developed jointly with the greatest integration experts. Every corner, curve and detail of the loudspeaker is meticulously studied to combine the pieces of the Uandksound DNA with one another in harmony and color. Perfection and elegance are the hallmarks that make it a benchmark for other brands that work on a unique and unrepeatable design.

## CINEMA SERIES

# M8 Speakers

### State of art redefined

After intensive studies Uandsound has completed a new step to renew its flagship reference models. As previous, M8 Series components are carefully selected and only those conforming to tightly defined tolerances are ultimately processed. The same care and attention is dedicated to the production of the crossover network, which along with the loudspeakers, is of fundamental importance to the quality of the diffusers.

All models are three-way design. Its separate low, medium and treble use 12dB/OCT divider, thus making the sound more clean, more precise in positioning specially thanks to the new developed tweeter. Some Uandsound tweeters use now Air Motion Transformer Technology to make the sound leap forward. A new extra slim body cabinet for M850-N is redesigned to be adapted to whatever custom installation. With carefully we have selected our components, and by using high quality speaker units, therefore given more expressive sound.

The power of the new M1500-N subwoofer has been improved. With its unique 1200W output power our new subwoofer will gives out a true and immersive experience. The subwoofer is also equipped with class D amplifier besides EQ room regulation and can be placed randomly.

Our extensive listening tests are a crucial part of the manufacturing process before each speaker and electronic are burned-in and thoroughly measured for several days. M8 Series advance to the final manufacturing step only if the measurements show no deviation.

## CINEMA SERIES

# M6 Speakers

### Slim as motto!

Following the similar concept as M8 Series, the new M6 Series can be wall mounted or flush to the wall because Uandksound has recently redesigned a new extra slim body cabinet for being adapted to complex custom installation.

Our main innovation to perform the best sound is the introduction of our last Air Motion tweeter. More precise and clean high frequencies are highly appreciated so that M6 Series have a strong sense of commitment with its acoustic and visual esthetic design. Naturally, their technical reliability and value are beyond our motto. Even the most innovative design is constantly improving so that Uandksound builds progress into every product investing effort to satisfy even the most discerning customers. That being so, M6 Series only offer the latest in audio technology for long term enjoyment.

M6 Series design is easily integrated into your living room. Their full enjoyment should not require a complex installation. Either to watch a movie or listening to your favourite singer, Uandksound brings to you an extensive catalog where young or elderly audio enthusiast can find the most suitable solution according to their preferences and possibilities without issue or compromise thanks to best value for money features.

## CINEMA SERIES

# S Speakers

### The pinnacle of high-performance audio

Key to their sophisticated sound is an advanced crossover network. Each loudspeaker crossover is built with the highest-quality components. Internals including massive air-core coils, thick, high-purity copper wire, and low-distortion capacitors ensure that every nuance of the audio signal is preserved.

Designed to excel in a wide variety of sound reinforcement applications, the full range S Series are compact wall mount loudspeaker that provides inspiring acoustic performance with exceptional clarity and articulation. Manufactured to the highest standards of quality, these products are available through authorized specialty custom installation specialists and carry the full Uandksound warranty.

Critical to architectural products is their ease of installation. The S Series continues Uandksound tradition of innovating engineering solutions which allow custom retailers to quickly and easily install their products. Each model features premium MDF enclosure and an extremely robust mounting-lock system that couples with the speaker's rigid chassis when installed. S series models allow installers to complete horizontal or vertical installation.

The standard finish for this product is black matte

## HOME SERIES

# M5 Speakers

### Beautiful design is the meaning of perfection

There is no greater comfort than sitting on the sofa to watch a movie or listening music of the most relaxed way. We are constantly working to provide the best listening experience and create the same feeling of a live musical or film performance. Uandsound knows the importance of feeling good at home surrounded by a pleasant environment where everything maintains an aesthetic coherence. We have always keen on to design products with a double function, functional and aesthetic.

Fashions change and adapting to them is very important, for this reason we have worked on the new M5 series, an evolution of the successful M3, but adapted to more discerning domestic environments where not only aesthetics prevails also an avantgarde sound prepared to reproduce high-resolution audio from the best films and music recordings. M5 Series are engineered with great care to integrate their visual presence in your interior.

The result is a refined entertainment experience without disrupting the beauty of your surroundings. All our products and components are proudly designed in Europe and our skilled and well trained engineers test every component carefully.

### Audiophile Performance

The new internals for the M5 series include an improved crossover that provides excellent linear response through a high-density structured cabinet to get an outstanding dynamic range, especially for home theater applications. Our renowned Air Motion ribbon tweeter is already implemented in many of our loudspeakers like M5 series. A more defined response and extended high frequency is only achieved with the most advanced components.

The internal structure of M5 Series has been developed in such a way that parallel surfaces are avoided inside to achieve a better sound diffraction and offering less distortion with high sound pressure levels.

M5 Series family consists of front, center and surround channels, also a dedicated active subwoofer. All this makes this equipment the perfect fashion loudspeakers solution to enjoy the best sound at home without the need of complex installations. Our timeless design will be the best warranty to enjoy the best sound in harmony without disrupting your home decoration for a long time.

## HOME SERIES

# M3 Speakers

### Enjoyment for all the family

Modern, concise and truly integrated and styled into your family living room. Experience the true cinematic effect. Their cabinet, heavy and rigid, provides excellent inertia to minimize vibrations. In terms of audio performance Uandsound loudspeakers have coherence between the different timbres as well as a homogeneous restitution of the different registers without undue emphasis on bass, midrange or treble. The M3 Series loudspeakers are balanced, well-defined and dynamic.

Our intention is to bring to your home the maximum enjoyment of the art in its fullest measure. Each Uandsound design has been developed with one goal in mind: to offer the highest harmony inside your home environment as well as transmitting

the purest audio fidelity. The M3 Series loudspeakers are designed to offer impeccable audio performance while integrating harmoniously into your home decor. For even more depth, they can be combined with the subwoofer M800II.

At the end, skilled, well trained ears test each component to ensure that everything is up to Uandsound standards. As a result, our affordable M3 Series are capable of reviving your lost emotions without leaving your home.

# HOME SERIES i Speakers

## All in one !

Innovation is in continuous progress because of new fashions. iOS and Android devices are very present in our lives, at the same time as our favourite music. Uandksound has developed the new iSeries Bluetooth loudspeakers to allow you to listen to music of the most enjoyable and easier way.

i5 loudspeakers Series share the same technology of the most powerful unit, i6 Series, while keep the similar design in a smaller cabinet without compromising the best bass response and reliable wireless transmission. Meanwhile, Bluetooth technology offers an easy integration fulfilling the wireless standard.

Uandksound iSeries Bluetooth loudspeakers integrate a dedicated control remote to control its functions and select different audio inputs. Now you can already share the music of your mobile phone besides other devices and enjoy your music out loud, with family and friends, in every room of your house.

If you are looking for the best value for money option, the ultimate stylish design and getting the most impressive sound performance i5 and i6 Bluetooth loudspeakers Series are the best choice. Simplicity and reliability will delight all your family.

# CUSTOM SERIES

ce Speakers  
Outdoor Speakers

## CUSTOM SERIES

# E Speakers

### The sound of invisibility

Our new E Series features allow Uandksound a new standard in acoustical performance to in-wall and in-ceiling applications. Designed for those seeking the world's most articulate and dynamic multi-channel home theater systems, or simply a stealthy 2-channel system, the E Series speakers are voice and timbre matched with one another, as well as the rest of the Uandksound products.

All models feature an ultra-low profile, micro perforated grille, which are also paintable for a near invisible integration into any wall or ceiling. Grilles firmly attached with neodymium magnets. E Series also include extra wide threaded screws for quick dog leg fastening. A magnetic system secures grilles easily into place, reducing the risk of warping or damage during installation.

Some of the key features are the following; Smooth Visual Flangeless System, PRX™ Poly Resin CrossPoint Molds, PRX™ dog legs, Never Rust™ grilles firmly attached with neodymium magnets besides extra wide threaded screws for quick installation and push gold plated binding posts.

## CUSTOM SERIES

# Outdoor Speakers

### Optimised for installation

Uandksound outdoor loudspeakers have been designed to blend in to outdoor environments. Available in white/black or green finishes the look of these loudspeakers will compliment landscaping designs and disappear into their surroundings. Each loudspeaker cabinet houses two drivers set at precise angles so you experience consistent stereo effects as you move around outdoors. Once mounted, the loudspeaker can be easily pivoted to direct the sound where you want it, and they will stay where you position them and not droop or slip over time.

Our loudspeakers utilize a durable weather-resistant construction that is built to withstand the harshest outdoor environments for a long time. Most discerning customers will appreciate the engineered construction for high-humidity ready to survive

extreme temperatures while maintaining superior sound quality. Uandksound loudspeakers feature internal wire connections to eliminate corrosion caused by moisture and to prevent damage from garden tools. Moreover Uandksound offers an associated balanced power amplifier VTA-240F II to get the best sound performance of each loudspeaker under the hardest environmental conditions.

You can enjoy clear, natural sound from an outside loudspeaker enclosure that easily mounts to walls in your deck, garden or pool area.

# M SERIES

M2300 | M7300  
M4500D | M7300D

## M SERIES

# M2300 / M7300

Impressive is  
an understatement!

M7300 uses category A line, having no crossover distortion, therefore the entire frequency range can be at very low level, especially at high frequency level. The sound quality of this unit is meticulously precise, especially the pure DC coupling, through the input of the amplifier and the design phase output. All these in combination will give you a real and live hearing experience.

The circuit of both professional power amplifiers is fully balanced, and all components are also chosen carefully throughout. The noise level can be as low as -105dB, up to a dynamic range of 120dB, therefore we can deemed this as a non-destructive amplified power amp. When in use, the audio signal in the speaker can hardly be heard.

Each channel is equipped with a separate transformer and power supply circuit, ensuring a high degree of separation and avoiding any crosstalk between respective channels throughout the frequency range, even up to or more than 80dB.

String sound level is also lower than most general background noise amplifier. Regardless of the cost of construction, we deemed to eliminate the problem of any multi-channel ground loop noise arising from the exchange section so that the users can experience the real audio and visual effects.

With exceptional clarity and dynamics, the M7300 and M2300 Series can create a huge soundstage that is almost holographic in its width and depth. From the most intimate acoustic recording to full-scale orchestral works, the performance is perfectly placed and never feels limited.

Combine our multichannel power amplifier with the M2300 Series and you will get an awesome combination ready to set up any complex home theater configuration.

## M SERIES

# M4500D / M7300D

### Effortlessly controls any loudspeaker

Our new class D power amplifiers represent the best in engineering ingenuity and available electronic components. With an extremely high damping factor and the ability to deliver huge currents the class D technology effortlessly controls any loudspeaker being the best partner for our flagship Reference Series. 750 watts for channel for M4500D and 300 watts for M7300D, with bridgeable option just for M4500D, guarantees the best sound performance of the market. Even loudspeakers with very low impedance are no match for the unflappable power supply of our power amplifiers.

### Perfect for any setup

M4500D power amplifier can function in a traditional stereo or multichannel setup because of the bridgeable option. If you connected device has a 12V trigger output, this can control the power state of the M4500D and M7300D, and even daisy-chain several M4500D or M7300D power amplifiers for complex installations.

### Benefits of true digital amplification

M4500D and M7300D are not a typical class D power amplifier. Our technology is much better, high current output of discrete MOSFETs with the efficiency of class D. The units have very low distortion and an excellent signal to noise ratio, making them the perfect amplifier on the market.

Uandksound solution offers noiseless and clear replay at all sound levels. The digital signal drives the loudspeakers directly, with no translation and no middleman offering a digital to analog conversion virtually perfect for the most demanded audiophiles. The result is a level of effortless power and advanced processing not available from any other manufacturer. You can be sure that our technology will deliver the most enjoyable and neutral sound you have ever experienced.

Feel the music soul!

Uandksound aims to redefine the world of Bluetooth headphones with the new LONDON ANC-HD200. Our headphones drivers are carefully selected for clear and balanced audio whether you are in a quiet office or busy street. Moreover, our first class ANC (double fed active noise cancellation) technology offers the most astonishing sound at any volumen without distortion so that you can focus on what really matters to you. HiFi sound with rich bass and treble is achieved with the extended frequency response engineered by our team.

Our headphones long battery life up to 40 hours is very helpful if you are outside home for a long time as well as the Bluetooth ON/OFF function if you prefer to connect your LONDON

ANC-HD200 headphones through the 3.5 mm audio input jack. Also the micro USB charging port allows you to charge the headphones easily at any time where you want, moreover its built in voice recognition technology offers the most reliable features.

LONDON ANC-HD200 headphones memory foam earpads bring you the most comfortable experience while you are listening music as well as you can easily fold them in a carrying bag included.

Enjoy your favourite music never was so pleasant.

SMART  
SERIES

# Oxford Earphones

Freedom without limitations!

Enjoy your favourite music never was so easy and simple. Uandksound and its engineers have been working hard to achieve the best sound performance inherit from the professional headphones to transmit it to the earphones for domestic use.

One of the main features that highlights OXFORD ANC-HD100 earphones is the active noise cancellation system. A really appreciated feature if we use earphones in the street or noisy environments. On the other hand, Uandksound applies Stereo True Wireless technology to its new Smart Bluetooth Earphones, which allows to transfer the two stereo audio channels independently through the latest Bluetooth 5.1 generation system.

Earphones improved autonomy up to 7 hours and the travelling case, which in addition to transport our earphones safely, also allow us to charge OXFORD ANC-HD100 earphones in a very simple way and fast until four times to extend the battery life more than 28 hours. Finally, highlight the touch control system that assures us the greatest comfort to enjoy the best sound experience by Uandksound.

FREQ. RESPONSE	50Hz-22kHz
POWER	80-160W
SPL	88 dB +/- 1.5 dB
WOOFER SIZE	2x4"
SIZE	495 X 190 X 180 mm
WEIGHT	5.9 kg
COLOUR	White gloss

## M320

IMPEDANCE	4 OHM
FREQUENCY RANGE	60-22000 Hz
POWER	80-160W
SPL	87 dB +/- 1.5 dB
SIZE	178 x 315 x 100 mm
WEIGHT	4,28 kg
COLOUR	White

## M330

IMPEDANCE	4 OHM
FREQUENCY RANGE	60-22000 Hz
POWER	80-160W
SPL	89 dB +/- 1.5 dB
SIZE	500 x 173 x 100 mm
WEIGHT	4,82 kg
COLOUR	White

HOME SERIES  
i Speakers

i6

IMPEDANCE	4 OHM
FREQUENCY RANGE	45-22000 Hz
POWER	200W
SPL	88 SPL
SIZE	232 x 232 x 814 mm
WEIGHT	32,3 kg (pair)
CONNECT. MODE	Bluetooth, Aux, Coaxial
TRANSMISSION MODE	5.8 G
REMOTE CONTROL	Yes
COLOUR	White

i5

IMPEDANCE	4 OHM
FREQUENCY RANGE	50-22000 Hz
POWER	160W
SPL	89 SPL
SIZE	190 x 190 x 805 mm
WEIGHT	20 kg (pair)
CONNECT. MODE	Bluetooth, Aux, Coaxial
TRANSMISSION MODE	5.8 G
REMOTE CONTROL	Yes
COLOUR	Black

CUSTOM SERIES  
E Speakers

E610 IW

IMPEDANCE	4 OHM
FREQ. RESPONSE	45Hz-22kHz
POWER AMP	80-160W
SPL	89 dB +/- 1.5 dB
WOOFER SIZE	6.5" aluminium
TWEETER SIZE	1" aluminum
TWEETER SETTINGS	+/- 3 dB
SIZE WITH GRILL	320 X 220 mm
SIZE WITHOUT GRILL	285 X 185 mm
MOUNTING DEPTH	103 mm
WEIGHT	2,1 kg

E620 IW

IMPEDANCE	4 OHM
FREQ. RESPONSE	45Hz-22kHz
POWER AMP	160-320W
SPL	89 dB +/- 1.5 dB
WOOFER SIZE	2x6.5" aluminium
TWEETER SIZE	1" aluminum
TWEETER SETTINGS	+/- 3 dB
SIZE WITH GRILL	492 X 220 mm
SIZE WITHOUT GRILL	456 X 185 mm
MOUNTING DEPTH	102 mm
WEIGHT	3,3 kg

E610 C

IMPEDANCE	4 OHM
FREQ. RESPONSE	45Hz-22kHz
POWER AMP	80-160W
SPL	89 dB +/- 1.5 dB
WOOFER SIZE	6.5" aluminium
TWEETER SIZE	1" aluminum
SIZE WITH GRILL	232 D mm
SIZE WITHOUT GRILL	203 D mm
MOUNTING DEPTH	98 mm
WEIGHT	1,6 kg

E1200 I

FREQ. RESPONSE	30Hz-250Hz
WOOFER TYPE	Coated paper
WOOFER SIZE	12"/30cm
POWER	300W class AB
VOLTAGE	110/220V
ENCLOSURE TECHNOLOGY	MDF material Bass reflex
SIZE	578 X 368 X 300 mm
WEIGHT	15,3 kg
COLOUR	Black matte

CUSTOM SERIES

# Outdoor Speakers

M SERIES

# M Series

## FS-X6

IMPEDANCE	8 OHM
FREQ. RESPONSE (-10dB)	80Hz-20kHz
POWER AMP	80-160W
MAX SPL	109 dB
WOOFER SIZE	6.5" woofer
TWEETER SIZE	1" tweeter
POWER TAPS	100V/70V/8ohm
SIZE WITH GRILL	213 X 310 X 195 mm
TEMPERATURE-HUMIDITY	-20-55°;<95%
MATERIAL	High Impact Polystyrene
COLOUR	Black / White
WEIGHT	3.7 kg

## WS-105

IMPEDANCE	1Kohm/2Kohm
FREQ. RESPONSE (-10dB)	110Hz-18kHz
POWER AMP	10-15W
MAX SPL	103 dB
WOOFER SIZE	4" woofer
TWEETER SIZE	1" tweeter
POWER TAPS	100V/70V
SIZE WITH GRILL	170 X 260 X 120 mm
TEMPERATURE-HUMIDITY	-20-55°;<95%
MATERIAL	High Impact ABS
COLOUR	Black / White
WEIGHT	1.3 kg

## M 7300

FREQ. RESP.	20Hz-20KHz +/-0.1dB
POWER OUTPUT	300W/4ohm
SNR	>115db,"A" weighted
THD	>0.02% at 20Hz-20KHz
INPUT IMPEDANCE	XLR/RCA 80Kohm
OUTPUT IMPEDANCE	<0.015, 20Hz to 20KHz
SENSITIVITY	1.75V
INPUT TERMINAL	7xXLR/RCA
SIZE	452 x 321 x 453 mm
WEIGHT	57 kg
COLOUR	Black

## M 4500D

FREQ. RESP.	20Hz-20KHz +/-0.5dB
POWER OUTPUT	750W/4ohm
DC offset	less than 10mV
THD	<0.01% at 20Hz-20KHz
SNR	>110dB
POWER REQUIREMENT	2300W
INPUT SENSITIVITY	0.775/1.55V
INPUT TERMINAL	4xXLR
SIZE	482 x 400 x 108 mm
WEIGHT	11 kg
COLOUR	Black

## LS-701B

IMPEDANCE	333/666 OHM
FREQ. RESPONSE (-10dB)	80Hz-20kHz
POWER AMP	30-45W
MAX SPL	107 dB
WOOFER SIZE	6.5" coaxial
TWEETER SIZE	1" coaxial
POWER TAPS	100V/70V
SIZE	325 X 370 mm
TEMPERATURE-HUMIDITY	-30-60°;<95%
MATERIAL	High Impact ABS
COLOUR	Green
WEIGHT	3.5 kg

## VTA-240F II

SNR	>66/>75 OHM
FREQ. RESPONSE (+-3dB)	20Hz-20kHz
POWER OUTPUT	240 W
MIC INPUT	-60dB, 600ohm, 6.3mm
AUX INPUT	-20dB, 10kohm
LINE OUTPUT	0dB, 600ohm
SPEAKERS OUTPUT	100V/8ohm
THD	<0.5% at 1kHz
SIZE	482 X 88 X 350 mm
POWER CONSUMPTION	350 W
COLOUR	Black
WEIGHT	12 kg

## M 2300

FREQ. RESP.	20Hz-20KHz +/-0.1dB
POWER OUTPUT	300W/4ohm
SNR	>115db,"A" weighted
THD	>0.02% at 20Hz-20KHz
INPUT IMPEDANCE	XLR/RCA 80Kohm
OUTPUT IMPEDANCE	<0.015, 20Hz to 20KHz
SENSITIVITY	1.75V
INPUT TERMINAL	2xXLR/RCA
SIZE	452 x 105 x 453 mm
WEIGHT	22 kg
COLOUR	Black

## M 7300D

FREQ. RESP.	20Hz-20kHz +/-0.5 dB
POWER OUTPUT	300W/8ohm
INPUT SIGNAL	>47Kohm
THD	<0.01% at 20Hz-20KHz
SNR	>110dB
TRIGGER CONNECTION	DC 12V
INPUT SENSITIVITY	0.775V
INPUT TERMINAL	7xXLR/RCA
SIZE	482 X 152 X 400 mm
WEIGHT	24 kg
COLOUR	Black

## STUDIO SERIES T Speakers

### T4

IMPEDANCE	4 OHM
FREQUENCY RANGE	56-22000 Hz
POWER	100W
INPUT VOLTAGE	120 / 230 V
SIZE	151 X 245 X 176 mm
WEIGHT	4,8 KG unit
ENCLOSURE	HQ MDF
TECHNOLOGY	Bass reflex
COLOUR	Black

### T6

IMPEDANCE	4 OHM
FREQUENCY RANGE	49-22000 Hz
POWER	200W
INPUT VOLTAGE	120 / 230 V
SIZE	220,5 X 346 X 248 mm
WEIGHT	10,5 KG unit
ENCLOSURE	HQ MDF
TECHNOLOGY	Bass reflex
COLOUR	Black

### T10

IMPEDANCE	4 OHM
FREQUENCY RANGE	30-250 Hz
POWER	500W
INPUT VOLTAGE	120 / 230 V
SIZE	344 X 445 X 387 mm
WEIGHT	24 KG unit
ENCLOSURE	EHQ MDF
TECHNOLOGY	Bass reflex
COLOUR	Black

## SMART SERIES Bluetooth devices

### Oxford ANC-HD100

Noise reduction chip	8773B
Bluetooth version	BT 5.1
Bluetooth profile	AAC, SBC
NC level	26 +/-3dB
Sensitivity (SPK)	110 dB SPL@1kHz
Range of frequency	20Hz-20Khz
Charging time	90 min
Battery life	1000 times
BT on+ ANC off	7h
BT off+ ANC on	8h
BT on+ ANC on	5h
Standby time	120h
Battery capacity	70mA
Type of battery	Rechargeable lithium-ion
Wireless range	10m
Water resistant	IPX5
Drive unit	9mm x2
Load impedance	32 ohm
Voice Wake up function	SIRI Assistant
Charging case size	76 L x 29 D x 50 H mm
Earphone size	17 W x 30 D x 29,5 L mm
Weight/earphone	6 gr
Weight/charging box	54 gr
Colour	Black / White

### London ANC-HD200

Noise reduction chip	AMS3435*2
Bluetooth version	BT 5.0
Bluetooth chip	QCC3005 5.0+EDR
Bluetooth profile	APT-X, A2DP, AVRCP, HFP, HSP
NC level	35 +/-3dB
Sensitivity (SPK)	105 db SPL@1Khz
Range of frequency	20Hz-20Khz
Signal to noise ratio	90dB
Drive unit	40mm dynamic driver x2
Total harmonic distortion	0.1-1% 100Hz
Load impedance	32 Ohm
Charging input	5V 1A Micro-USB cable
Charging time	180 min
BT on+ ANC off	40h
BT off+ ANC on	35h
BT on+ ANC on	20h
Battery capacity	750mA
Type of battery	Rechargeable lithium-ion
Wireless range	Up to 20m in open environment
Voice Wake up function	SIRI Assistant
Water resistant	IPX5
Standby time	720h
Headphones size	19 L x 9 D x 16 W cm
Colour	Black / Silver

# WHERE TO BUY?

EUROPE AND ASIA  
AMERICA

Dolby Atmos Home Theatre configuration  
equipped with UandKSound M8, M6 loudspeakers
